

```
1  import { Occurrence } from './occurrence.model';
2
3  export class Category {
4      constructor(
5          public categoryName: string,
6          public categoryDesc: string,
7          public occurrences: Occurrence[]
8      ) {}
9  }
10
```
